KIDNEY INTERNATIONAL serves as the respected spokesman for the broadest possible range of interest within international nephrology. Multidisciplinary in scope, the journal plays an important role as a source of continuing education for the clinician and investigator alike. It collates much of the best kidney-oriented research into a single journal. The content consists mainly of original laboratory and clinical research derived from various disciplines—physiology, biochemistry, pathology, immunology and morphology. Special symposia directed toward clinical as well as basic research problems are included within the pages of the journal.

The following are still available:
Symposium on Acid-Base Homeostasis
Immunological Aspects of Renal Disease
Divalent Ions in Renal Failure
Festschrift for Jean Redman Oliver

Forthcoming:
End-Stage Diabetic Nephropathy
Hormones and the Kidney
Membrane Transport Processes and Nephrology
Morphologic Aspects of Renal Disease
